

Roman Petrov

Software Developer

Profile

My favorite tool in software development is **Occam's razor**.

The areas of my proficiency are:

- problem solving: analysis, communication, decomposition, MVP
- programming: modular, testable, readable, compact, efficient code
- code quality: automated code analysis, linting, code review
- project workflow: automation, simplification, documentation
- user experience: simplicity, visual perfection, screenshot tests
- open source: use, contribute, learn

I prefer functional programming to object oriented approach and my favorite code unit is **pure function**.

I would like to land a software developer position in a company that:

- cares about the code quality in projects
- cares about the user experience quality in products
- provides possibilities to grow as professional

Education

Master, Volga State University of Technology, Yoshkar-Ola

September 1999 — May 2004

Employment History

Lead developer and team lead at TravelLine

2013 — Present

www.travelline.ru

I'm currently working for TravelLine company as a front-end architect, team lead and developer. My primary goal is to move company products from outdated and ineffective development stack to Flutter:

- make products cross-platform
- improve user experience and user interface quality
- design and develop Flutter ecosystem, tools, components, and workflow

Projects:

- **TLUI3.0 (NOW)** - TravelLine User Interface library and design system based on Flutter (architect, lead developer and team lead)
- **TLF** - TravelLine Flutter tool to automate workflow for company Flutter projects (single developer)
- **TLUI** - TravelLine User Interface library and design system (lead developer and team lead)
- Payment module front-end for online booking engine (single developer)

Hobbies

Programming, Travel, Camping, Guitar

Developer at iSpring

2007 — 2013

www.ispringsolutions.com

Projects:

- Flash media player & charting library ([developer](#))
- [SilverX](#) - Flash to Silverlight converter ([single developer](#), [website developer](#))
- [PowerMessage](#) - PowerPoint add-on to build presentations from templates ([single developer](#))

Lead developer and team lead at CPS Labs

2003 — 2007

www.cpslabs.net

Projects:

- [JobWindow](#) - Job search system in Switzerland ([developer](#))
- [ActiveSWF](#) - SWF file (Flash) generation library ([single developer](#))
- [SlingPlayer](#) - Streaming media player for [SlingMedia](#) ([lead developer and team lead](#))

Challenging activities

Machine learning contest

2015

I took part in the Beeline Big Data contest. It was my first experience in machine learning so it's been quite a challenge for me. I was ranked the 236 out of 832 participants.

ZX-Spectrum

1995 — 2000

During my school years my favorite hobby was assembler programming on ZX-Spectrum. I'm the author of RIP (Real Information Packer) - LZW/Huffman data compression algorithm and application.

This was a challenge and I managed to achieve one of the best compression ratios compared to other ZX-Spectrum data compression tools.
