

Roman Petrov

Software Developer

Profile

My favorite tool in software development is [Occam's razor](#). I`m mostly interested and experienced in:

- problem solving: analysis, communication, decomposition, MVP
- programming: modular, testable, readable, small, efficient code
- code quality: automated code analysis, linting, code review
- project workflow: automation, simplification, documentation
- user experience: make things simple, visually perfect
- open source: use, contribute, learn

I prefer functional programming to object oriented approach and my favorite code unit is **pure function**.

I am looking forward to find a software developer position in a company that:

- will give possibilities to grow up and fully realize my potential
- cares about the UX quality in their products
- cares about the code quality in their projects

Employment History

Lead developer and team lead at CPS Labs

2003 — 2007

- [JobWindow](#) - Job search system in Switzerland ([developer](#))
- [ActiveSWF](#) - SWF file (Flash) generation library ([single developer](#))
- [SlingPlayer](#) - Streaming media player for [SlingMedia](#) company ([lead developer and team lead](#))

Developer at iSpring

2007 — 2013

- Flash media player & charting library ([developer](#))
- [SilverX](#) - Flash to Silverlight converter ([single developer](#), [web site developer](#))
- [PowerMessage](#) - PowerPoint add-on to build presentations from templates ([single developer](#))

Lead developer and team lead at TravelLine

2013 — Present

At the moment I work at TravelLine company as front-end architect, team lead and developer. My primary focus is to move out company products from outdated and ineffective development stack to Flutter.

My primary goals are:

- Make products cross-platform
- Improve user experience and user interface quality
- Design and develop Flutter ecosystem, tools, components and workflow

Hobbies

Travel, Camping, Programming, Guitar, Poker

Projects I worked on:

- **TLUI** - TravelLine User Interface library ([lead developer and team lead](#))
- **TLUI3.0** - TLUI project restart in Flutter ([architect, lead developer and team lead](#))
- **TLF** - TravelLine Flutter tool to automate workflow for company Flutter projects
- Payment module front-end ([single developer](#))

🎓 Education

Master, Volga State University of Technology, Yoshkar-Ola

September 1999 — May 2004

🏠 Challenging activities

ZX-Spectrum

1995 — 2000

In a school my favorite hobby was assembler programming on ZX-Spectrum. I`m the author of RIP (Real Information Packer) - LZW/Huffman data compression algorithm and application.

This was a competitive challenge and I managed to achieve one of the best compression ratio compared to other ZX-Spectrum data compression tools. Some references (in Russian):

- About me at [Speccy.info](#)
- RIP at [Speccy.info](#)
- About RIP at [zxpress.ru](#)

Machine learning contest

2015

I took part in Beeline Big Data contest. It was my first experience in machine learning so it was the challenge for me. The contest had **832** participants and I my result was **236**. [Contest info and results](#) (in Russian).
